

- The thermal power control can modulate within a large range (25-100%) and control the flow of the brine and the production circuit.
- Integrated management of up to 5 different distribution temperatures, 2 different buffer tanks (1 for cooling and 1 for heating), 1 DHW tank, 1 pool and the daily schedule of DHW recirculation.
- Integrated management of external variable or ON/OFF auxiliary systems such as boilers or electric resistances.
- Management of cascade systems up to 6 units.
- Integrated management of simultaneous heating/cooling

- systems according to the scheme.
- Passive Cooling management.
- Integrated Active cooling in HP3 models.
- Three-phase electrical power supply.
- Compatibility with e-manager and e-system
- Integrated energy meters to measure the electric consumption, the heating/cooling thermal power, the COP and the monthly and annual SPF.
